EXPERIENCE

Freelance Programmer & IT Support

2018 - Present

Independent freelance work | Remote

- Delivered full-stack web solutions for educators and students on thesis projects. Developed Python automation tools and GUI apps for personal and client use. Resolved Windows and Office installation needs, PC assembly, and small internet management tasks. Built freelance experience starting in senior high school and continuing through college and after graduation.
- Developed and maintained software applications using structured programming practices.
- Debugged code to resolve defects and enhance application reliability.

Broadband / Network Technician Trainee

January 2024 – May 2024

Kabayan Broadband | Network Technician Trainee | Cuenca, Province of Batangas, Philippines

- Executed optical time-domain reflectometry (OTDR) testing and fiber-optic fusion splicing to support broadband network installation during on-the-job training.
- Completed on-the-job training in a college setting.
- Installed and configured routers, switches, modems, and customer network equipment.
- Resolved connectivity issues through line testing, signal checks, and fault isolation.
- Performed site surveys and verified cable routes for reliable broadband service.

EDUCATION

Bachelor of Science in Information Technology, Major in Networking 2020 - 2024

Batangas State University - Alangilan Campus, Alangilan, Batangas City

Technical-Vocational-Livelihood, ICT Track 2018 - 2020
